

Bay Area

CRIME AND INTELLIGENCE ANALYSTS ASSOCIATION

is pleased to present:

Connected Car Investigations

Computers and the Internet have given modern vehicles the ability to talk to use and share our lives with the outside world. Like most digital devices, cars are leaving a digital footprint with data that can be very useful in criminal investigations. This data includes call and text records, social media activity, car event data, and more.

This class is a rich content environment that will teach you how to view cars as a new class of evidence in every crime and provide you with tools to police in the 21st century.

This class will cover new investigative tools and techniques involving:

- Vehicle Telematics
- Mobile Wi-Fi
- Infotainment Systems
- Radio Frequency ID (RFID) Tags
- Fleet Management Systems
- Car Services
- The information and evidence these technologies provide
- How this data is vital to all types of investigations
- Legal challenges and how to address them

3/30/2020 0800-1700

Hayward City Hall 777 B St.

\$85 for non-members

\$60 for members

Limited Seating Available
