Course Description / Objectives: Facial Recognition (FR) is becoming a key part in ever growing “tool kit” for Law Enforcement Agencies. This course will provide an in-depth overview of the current state of Facial Recognition Technology, legal aspects, and best deployment practices. It will then look to where FR is headed, showing nationwide, cloud based databases of 18 million open source images of LEA mugshots and known sex offenders. Attendees will get the chance to work through real-world scenarios on Facial Recognition databases, utilizing enhancement tools with step-by-step instruction. While you will learn about Facial Recognition technology and best deployment practices, this course will utilize Vigilant Solutions’ FaceSearch program. Attendees will see how using millions of open source images in an established gallery complements their current local booking images.

Learn how to maximize your investigative efforts by implementing FR technology and improve in almost every facet of the job, including both areas of proactive field enforcement and investigations. At the conclusion of this class, each attendee will retain access to FaceSearch with login credentials for 30 days.

Target Audience / Discipline: This instruction is designed for **Active** peace officers, state investigators, federal agents, military investigative personnel, or other government employees working within the public safety / homeland security community.
